

Audiology Referral Checklist

Our Doctors of Audiology see patients from the ages of 5+

COMPLAINTS/SYMPTOMS WARRANTING A REFERRAL FOR AUDIOMETRY

- Patients presenting with hearing or processing difficulties
- Patients presenting with tinnitus
- Patients undergoing going chemotherapy
- Patients taking other ototoxic medications
- Patients 55+ for annual hearing exams
- Patients who have been exposed to noise
- Patients with better hearing in one ear
- Patients who have experienced a sudden hearing loss (Emergent! Need to be seen within 24-48 hours)

WHAT WILL THIS TEST REVEAL

- The status of a patient's peripheral auditory nervous system, including the status of the middle ear
- Speech in noise
- Speech discrimination
- If a patient's current treatment plan is compromising their hearing
